

NIRMAL RAJ P

FRONTEND DEVELOPER | REACT.JS | NEXT.JS | JAVASCRIPT | TYPESCRIPT

Chennai, Tamil Nadu, India | +91 9360147391 | nirmalraj1628@gmail.com

SUMMARY

Frontend Developer with 5 years of experience building scalable enterprise applications using React.js, Next.js, TypeScript, and JavaScript ES6+. Specialized in frontend architecture, reusable component systems, TanStack React Query, complex admin dashboards, and performance optimization. Experienced in building data-intensive applications and enterprise UI libraries with a strong focus on scalability, maintainability, and modern React development practices.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript ES6+, TypeScript, HTML5, CSS3, SCSS
Backend: Node.js, Express.js, MongoDB, MySQL
State & Data: Redux Toolkit, Context API, TanStack React Query, Axios, RESTful APIs, GraphQL
AI: Prompt Engineering, AI-Assisted Development, Cursor, ChatGPT, Claude, Antigravity
UI & Design Systems: Tailwind CSS, Material UI, Mantine UI, Storybook
Performance: Component Architecture, Lazy Loading, Code Splitting, Caching
Testing: Jest, React Testing Library, Cypress
Tools: Git, GitLab, GitHub, Docker, Webpack, npm, Yarn, Agile

EXPERIENCE

Frontend Developer | React.js & Next.js Developer Jan 2026 - Present

Yitro Tech Pvt Ltd - Client: GTI Technology

- Architect enterprise-scale applications using Next.js App Router, TypeScript, Server/Client Components, and optimized data-fetching patterns.
- Engineered a reusable system of UI components, advanced data tables, and dynamic filtering workflows across multiple enterprise modules, accelerating development cycles and cutting down redundant code duplication.
- Managed complex server and client state transitions smoothly by integrating TanStack React Query.
- Implemented advanced TanStack React Query caching mechanisms and strategic query invalidation, reducing redundant API requests and ensuring real-time data consistency across admin portals.
- Improved page load performance through lazy loading, memoization, route-level code splitting, and optimized data-fetching strategies.

Software Engineer | Frontend Developer Mar 2025 - Dec 2025

BCT Consulting – Client: RR Donnelley

- Built data-intensive enterprise planning and reporting dashboards using React.js, Next.js, and TypeScript to support heavy analytics workflows across multiple modules.
- Developed highly responsive visualization components for complex KPI tracking, trend analysis, and large analytics datasets.
- Optimized frontend performance and delivery speeds by executing route-level code splitting, lazy loading, and efficient API data-fetching strategies.
- Standardized frontend data-management patterns across the team by integrating multiple complex RESTful API workflows with TanStack React Query.
- Conducted peer code reviews and contributed to reusable frontend standards, improving code consistency across the frontend team.

Software Engineer | Frontend Developer May 2024 - Jan 2025

Colan Infotech Pvt Ltd

- Developed highly responsive, pixel-perfect web applications utilizing React.js and JavaScript ES6+.
- Enhanced runtime application performance by applying code refactoring, lazy loading, and tree-shaking practices.
- Designed modular, user-friendly interface components following scalable, reusable development principles.
- Collaborated with backend and design teams to implement functional and user-friendly web interfaces.

- Developed and maintained Single Page Applications using React.js and JavaScript ES6+.
- Implemented application state management using Redux and Context API.
- Built interactive frontend features for financial, e-commerce, and blockchain-based web applications.
- Followed reusable component development and responsive web-design practices across multiple projects.

PROJECTS

PASS Admin Panel – Ride, Delivery & Mall

- Developed a centralized enterprise admin platform to manage Ride, Delivery, and Mall operations.
- Built scalable admin modules, advanced data tables, dynamic filters, forms, and reusable UI components using React.js, Next.js, and TypeScript.
- Integrated RESTful APIs and TanStack React Query for efficient data fetching, caching, query invalidation, and server-state synchronization.
- Built responsive admin dashboards designed to support complex operational workflows.

Tech Stack: React.js, Next.js, TypeScript, TanStack React Query, RESTful APIs, Tailwind CSS, GitLab

Quattro – Planning & Reporting

- Developed key frontend modules for an enterprise marketing analytics and planning platform used to monitor campaign performance across multiple channels.
- Integrated Sisense BI to fetch, process, and visualize large analytics datasets.
- Built React-based dashboards for performance reporting, trend analysis, and KPI tracking.
- Developed planning workflows that enabled organizations to create, manage, and optimize marketing campaign strategies.
- Collaborated with engineering teams to improve frontend maintainability and application performance.

Tech Stack: React.js, Next.js, TypeScript, Axios, RESTful APIs, Horizon React Components

Horizon React Component Library – Custom UI Package

- Contributed to the development and enhancement of an enterprise React component library used across multiple frontend applications.
- Built reusable and modular UI components using React.js, TypeScript, Mantine UI, and SCSS.
- Developed and maintained component documentation and UI examples using Storybook.
- Refactored existing components to improve maintainability, performance, and theme compatibility.

Tech Stack: React.js, TypeScript, Mantine UI, Storybook, npm

Kreon Financial Service

- Developed a React-based financial platform that enabled employees to apply for loans through their organizations.
- Implemented role-based user interfaces to support employees and organizational users.
- Integrated RESTful APIs for loan application, approval, and financial workflow management.
- Developed responsive interfaces focused on usability and maintainable frontend architecture.

Tech Stack: React.js, TypeScript, Redux, RESTful APIs, Material UI, Axios

Neoswap Token Bridge

- Developed a token bridge feature for a cryptocurrency exchange platform using React.js.
- Built frontend workflows to enable token transfers between blockchain networks.
- Implemented transaction monitoring and real-time status updates for cross-chain transfers.
- Integrated Web3 functionality and RESTful APIs for blockchain transaction workflows.

Tech Stack: React.js, JavaScript, Redux, Web3.js, RESTful APIs, HTML5, CSS3, Bootstrap

EDUCATION

Subbalakshmi Lakshmipathy College of Science

Bachelor of Computer Science

2018 – 2021

VHN Higher Secondary School

Higher Secondary School

2018
